Summary

Information Science Engineering graduate with practical AWS experience in EC2, S3, RDS, Lambda, VPC, IAM, and CloudWatch. Skilled in cloud deployment, serverless architectures, static website hosting, Git, Python, SQL, and MongoDB. Focused on building secure, scalable, and cost-efficient cloud solutions with a strong commitment to continuous learning

Experience

Vtricks technology bengalure
DevOps intern february 2026-present

- Gained hands-on experience in **Linux system administration and shell commands**
- Worked with **Git and GitHub** for version control and collaboration
- Learned core **cloud computing concepts and AWS services**
- Explored **containerization and orchestration using Kubernetes**
- Practiced **Infrastructure as Code using Terraform**
- Studied **configuration management and automation with Ansible**

🔗 lamda	🔗 github	🔗 cloud watch	🔗 linux

Projects

Serverless Feedback Web Application
Built and deployed a fully serverless feedback collection application on AWS. Hosted the frontend on S3 and connected it with backend APIs through API Gateway. Implemented backend input validation and data storage using Lambda (Python) and DynamoDB. Configured IAM roles, CORS, and API permissions for secure, scalable communication. Achieved a zero-maintenance, cost-efficient serverless architecture.

Blockchain-Based Agri-Food Supply Chain
Developed a blockchain-powered system to improve product traceability and supply chain transparency. Implemented lifecycle tracking for agricultural products. Developed a blockchain-powered system to improve product traceability and supply chain transparency. Implemented lifecycle tracking for agricultural products

AWS Static Website Hosting
Deployed a static portfolio website on Amazon S3 with CloudFront for caching and performance. Configured Route 53 for domain mapping and ACM for HTTPS. Implemented automated updates using AWS CodePipeline. Ensured secure access through IAM and bucket policies. Deployed a static portfolio website on Amazon S3 with CloudFront for caching and performance. Configured Route 53 for domain mapping and ACM for HTTPS. Implemented automated updates using AWS CodePipeline. Ensured secure access through IAM and bucket policies.
